

A decorative background featuring a complex molecular structure with various colored atoms (red, blue, white, yellow, green) connected by bonds, set against a teal gradient. The structure is partially obscured by a white text box.

# Introduction to Genealogical Research

Join Bill Curtis, member and Community Education Coordinator for the Manitoba Genealogical Society to get started researching your family tree.

## **Finding Your Information**

Monday, October 23: 5:30-7:30 p.m.

When researching your family history, you will want to know where to find information. Some of that information is “hidden” on the internet. This session will show you how dig out the information that applies to your own specific family, and will help you find libraries and archives that contain information not available online.

## **DNA Testing for Genealogy**

Monday, October 30: 5:30-7:30 p.m.

Are you thinking of doing, or have you already done a DNA test? Can DNA testing help solve a family mystery? This session will give you a basic understanding of what DNA testing is, explaining what kinds of DNA tests are available, and what they can and cannot tell you. It will cover topics such as finding living relatives today and how far back you might be able to trace your family.

Free. Phone, visit or go online at [winnipeg.ca/library](http://winnipeg.ca/library) to register. This is an online event. A Zoom link to attend will be sent when you register.
